Summary

Software Developer with over four years of experience based in San Antonio de Areco, **Buenos Aires,** specializing in developing **robust** and **scalable backend solutions** using **Node.js, Python,** and **Java.** Proven success in enterprise environments such as *Teladoc Health*, demonstrating expertise in s**oftware architecture, system design,** and cloud environments. Passionate about creating **maintainable, high-performance** solutions that drive business growth and enhance user experiences across diverse industries.

Experience

Teladoc Health | Software Engineer   **Dic 2022 - Present**

Successfully developed a rules engine microservice from the ground up to effectively manage critical business decisions, supporting a wide range of platforms within the organization, and has reduced business change requests by 45%. Designed and implemented a secure Single Sign-On (SSO) system, significantly enhancing the experience for approximately 3,000 users. Played a key role in migrating on-premises applications to AWS and Azure cloud environments.

AstralMatch | Software Developer   **Aug 2022 - Dic 2022**

Led full-stack development of mobile, backend, and web applications. Designed and implemented key features that aligned with user needs and business goals, contributing to an increase in active users from 2,000 to 5,000. Applied agile methodologies to ensure timely and high-quality delivery.

Typeland | Back End Developer   **Jun 2022 - Dic 2022**

Built scalable backend services using Node.js for enterprise applications. Developed a file storage system using AWS S3 to support various services, ensuring efficient data management. Improved CI/CD processes using Docker for seamless deployment.

APX | Technical content creator   **Jun 2021 - Dic 2022**

Developed educational content on web development for courses, blogs, and YouTube (1,500+ students, 16K subscribers, ~5K blog readers). Recorded instructional videos and tutorials to simplify complex programming concepts. Reviewed student projects, providing feedback to improve learning outcomes.

Independent | Full Stack Developer   **Nov 2020 - May 2022**

Delivered comprehensive web applications and solutions from concept to production, integrating payment processing systems and CRM solutions seamlessly. Collaborated closely with clients to understand their business requirements and consistently delivered solutions that exceeded their expectations. Managed project timelines and deliverables independently, consistently meeting deadlines while upholding high standards of code quality.
